Linnaeus University Summer Academy

Linnaeus University
Summer Academy

To be able to eat dinner with students from countries such as South Africa, Israel, Canada and Spain, all at once is a life time experience. Also, spending my summer in Kalmar has been wonderful! The warm weather made swimming in the Baltic Sea a truly great experience and a good way to cool off together with my newfound friends.

MITCHELL, USA

The classes were incredibly interesting and played a big role in my great experience of Summer Academy. The relationship between students and professors is informal which motivates you to ask questions and participate in discussions. Moreover, the classes are incredibly creative with different forms of teaching.

FARAH, RUSSIA

Linnaeus University

Summer Academy

JULY 12 – AUGUST 16, 2019

Linnaeus University Summer Academy offers an international, intercultural and interdisciplinary study environment – unique of its kind in Sweden.

The courses within our Summer Academy originate in Swedish culture and an innovative mindset. They are workshop-oriented and have a strong student focus. Courses are offered on undergraduate level. The Summer Academy runs in the beautiful medieval city of Kalmar, one of our study sites. All courses are 7.5 credit full-time courses, taught in English and many have general entry requirements.

The combination of lectures and workshops within the student's own course and weekly interdisciplinary sessions for all participants at the academy, provide opportunities for new contacts and cultural insights – both from other students and from local and global business representatives. An extensive social programme will contribute to an increased knowledge of Swedish culture and society. The programme offers organised day-trips and weekend excursions as well as outdoor and sports activities and cultural events.

Study, enjoy Sweden and grow as a person – join our Summer Academy!

The region as a base, the world as a stage!

Linnaeus University has taken its name from Carl Linnaeus, the most famous and world-renowned Swedish scientist of the last few centuries. Carl Linnaeus was curious and innovative – the key values at our university. While the university is firmly rooted in the Småland region of southern Sweden where Linnaeus was born, our activities, like his, have no boundaries.

Linnaeus University has a long tradition of offering degree programmes and courses in English, attracting more than 1,800 international students every year. In the summer of 2014, we introduced Linnaeus University Summer Academy.

As a student participating in our Summer Academy you will get the opportunity to achieve unique academic experience that will enhance your CV and your further career. You will also make new contacts and gain cultural insights from Swedish students as well as international students and students with different disciplinary backgrounds. It will take place in a season when the town of Kalmar, and Sweden as a whole, is at its very best.

We welcome you to participate in Linnaeus University Summer Academy – a place that makes people grow!

*Ann-Charlotte Larsson,
Deputy Vice-Chancellor*
